## **STAFF REPORT**

---

**DATE:** April 25, 2022  
**FOR:** Security & Community Access Committee  
**SUBJECT:** Replacement of Stop Signs

---

### **RECOMMENDATION**

Staff recommends the replacement of twenty-one (21) stop signs throughout the Village with solar powered, flashing, red Light-Emitting Diode (LED) lights, with a supplemental appropriation of \$42,913 to be funded from the Equipment Fund.

### **BACKGROUND**

The Golden Rain Foundation (GRF) Traffic Division enforces rules and regulations within the boundaries of Laguna Woods Village. The Officers are empowered to issue notices of violations (NOV). Individuals who receive an NOV may be subject to a fine and other disciplinary action. The traffic rules enforcement program is coordinated by the Security Services Department.

In 2021, Traffic Specialists issued over 500 NOV's to drivers that failed to stop at posted stop signs throughout the Village.

### **DISCUSSION**

The Security Services Department conducted an assessment of the existing stop signs and intersections throughout the Village. The assessment included reviewing historical stop sign violations, discussions with Traffic Specialists, Supervisors and a physical review of the intersections. The assessment considered the visibility of existing signs, roadway configuration, and heavy vehicle and pedestrian traffic areas.

The purpose of the solar powered red LED flashing stop signs is to capture the driver's attention through supplemental visual input. It is intended to increase stopping compliance and reduce or prevent accidents by alerting the drivers of upcoming roadway changes, so they do not unintentionally run the stop sign. Having solar powered red flashing LED flashing lights will not only cut the cost due to the signs not needing to be hardwired, they will still flash day or night during a power outage when all the street lights are out. The solar powered red flashing LED stop signs are 30" octagon shapes.

The Security Services Department has identified twenty one (21) stop signs within the Village to be replaced with the solar powered red LED flashing stop signs (Attachment 1).

## **FINANCIAL ANALYSIS**

If approved, the cost will be approximately \$42,913 and will be funded from the Equipment Fund. Any ongoing maintenance cost will be included as part of the Business Plan.

Below is the cost associated with this purchase:

<b>Proposed Outlay</b>	<b>Estimated Cost</b>
21 LED 30" Stop Signs with Telespar Pole, Hardware and Supplies	\$36,483
Labor (VMS personnel)	\$6,430
<b>Total</b>	<b>\$42,913</b>
