Review Preliminary Financial Statements dated May 31, 2022

The committee reviewed the financial statements dated May 31, 2022. Questions were addressed.

Endorsement from Standing Committees

Security Services – Supplemental Appropriation for Replacement of Stop Signs. Eric Nunez, Director of Security Services, presented a staff report that was previously reviewed at the GRF Board meeting on June 7th. The staff report recommended the replacement of 21 stop signs with solar powered, flashing LED lights with a supplemental appropriation from the Equipment Fund in the amount of \$42,913. Director Elsie Addington made a motion to endorse the recommendation to replace stop signs as written. Chair Hopkins seconded the motion. The motion failed by a 3-2 vote. Director Hopkins requested those with a dissenting vote to share their concerns via email in an effort to communicate the collective concerns to the board.

MEMORANDUM

To: GRF Finance Committee

From: Jose Campos, Assistant Director of Financial Services

Date: August 17, 2022

Re: Department Head Update

Financial Highlights

■ SUMMARY: July 31, 2022, GRF was better than budget by \$1,798K, primarily due to lower employee compensation expense as outlined below, increased Trust Facilities Fees, resulting from more resales than anticipated, lower outside services costs primarily due to a late start in evening janitorial services as some clubhouses were closed earlier this year, most have re-opened with limited hours. Savings was partially offset by unrealized loss on investments due to an adverse market.

INCOME STATEMENT

COMPENSATION:

Actual compensation and related costs came in at a total of \$13.4M, which was less than budget by \$1.3M or 9.1%. Favorable variance was primarily due to vacancies in General Services for bus driver and janitorial positions, and Security Services due to vacancies for Security Officers for which recruitment is in progress. In addition, Recreation, has various positions unfilled, resulting in limited Clubhouse hours open. Maintenance and Construction vacancies also contributed to the variance.

UTILITIES: Overall, utilities are (14.29%) unfavorable to budget, with expenditures of \$1.5M through July. The unfavorable variance is due to higher water expense for the golf course, as a result of 74% less rainfall than 3-year average used for budgeting and rising electricity costs amongst all departments.

Discussions

2023 Business Plan: GRF kicked off the 2023 Business Plan development in March. The board has met several times to review various iterations of the budget and Capital Review. Most recently, the GRF Board met on August 8, to review Version 3 of the 2023 Business Plan and Capital Plan. The final version of the 2023 Business Plan and Capital Plan, which includes a \$3.81 PMPM increase compared to the current year, will be presented for adoption on September 6, 2022.

WE'VE BEEN HERE BEFORE (SORT OF)

Some economists warn of a potential return to 1970s-era "stagflation," an economy that simultaneously experiences increasing inflation and stagnant economic output. Here, we explore some of the key similarities and differences between the economic landscapes of the 1970s-1980s and today.

1970s and 1980s

High unemployment (8.5%) in December 1981. This was the Fed's predominant problem.

Slow Fed Response: Inflation had run high through the 1970s before the Volcker Fed prioritized price stability.

Higher rates: The federal funds rate was around № 10% when Volcker took over in 1979. By 1981, short-term rates peaked at over 19%.

The Fed did not directly intervene in bond markets.

WHAT'S SIMILAR

High inflation (8.9% in December 1981 vs. 9.1% in June 2022)

Weak growth backdrops following recent recessions (1974 and 2020)

Supply disruptions driven by pandemic and Russia sanctions, similar to 1970s oil shocks

Jerome Powell's recent hardline statements on inflation resemble Paul Volcker in the 1980s

Consumers expect more inflation, and consumer sentiment is falling

2022

Low unemployment (3.6% in June 2022). Until mid-2021, the Fed's predominant problem was too-low inflation and too few workers.

Rapid Fed Response: Fed policy focus shifted to price stability within a year of inflation reaching 5%.

Lower rates: The Fed is targeting a federal funds rate of 1.50%-1.75%, and rates are expected to stay below 4% through 2022.

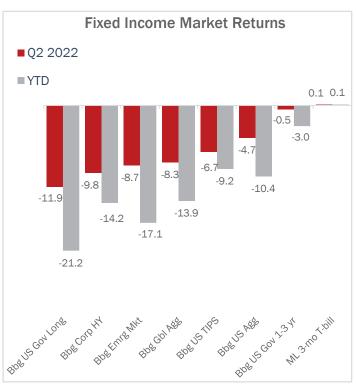

The Fed has regularly intervened in bond markets for more than a decade.

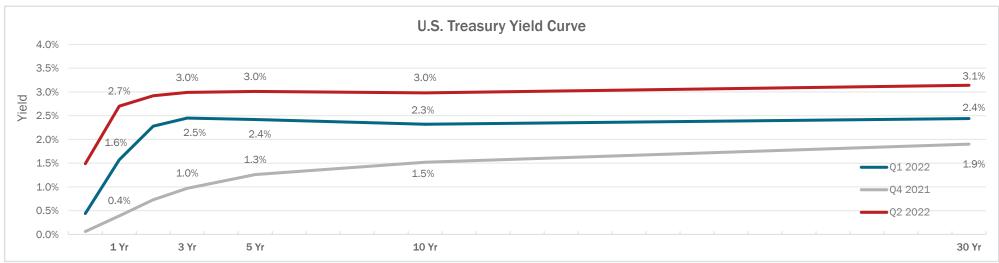

FIXED INCOME

Late in the quarter, the Fed shifted to more aggressive rate increases as inflationary data accelerated. Concurrently, the yield curve flattened, signaling increased odds of a recession. Credit spreads widened amid muted growth prospects and inflationary pressures. Despite recessionary signals, corporate credit fundamentals (EBITDA, Free Cash Flow, Interest Coverage Ratios) remain strong.

Executive Summary and Observations

- Assets total \$18,461,259 at June 30,2022, down from \$19,530,473 at December 31, 2021.
- Activity during the second half of 2021:
 - -Removed Fidelity intermediate duration Treasury bond fund
 - -Removed Vanguard Intermediate duration corporate bond fund
 - -Reallocated proceeds to short duration Treasury and corporate bond funds
 - -No trades for first half of 2022
- For the quarter, the net total return was -1.87%, compared to the Bloomberg Barclays US Government 1-5 Year Treasury Index benchmark return of -0.85%. For year to date, the net total return was -5.38%, compared to the Bloomberg Barclays US Government 1-5 Year Treasury Index benchmark return of -4.20%.
- The portfolio is heavily allocated to index funds, leading to a low portfolio expense ratio of 0.07%.
- The portfolio has very high quality, with virtually no credit risk. The recent negative performance is due to the rise in interest rates and the related required accounting adjustments.
- The yield on the portfolio today is up substantially from the beginning of 2022, to 3.35%. This equates to an
 approximate annual return on the portfolio of \$620,000. As of June 30, most t-bills and money market
 funds were yielding 2.0% or less.
- As of August 10, 2022, portfolio balance is \$18,629,639, up \$168,000 from June 30, 2022.

ACTIVE INVESTMENT OPTIONS ANALYSIS CRITERIA

All active plan investment options are reviewed quarterly against their peer group and index benchmark to determine the performance and quality of each offering. Each are evaluated using the following criteria:

- 1. Trailing 1, 3, 5 and 10 year returns Total return is a basic measure of a fund's performance. Fund returns over each period are factored into a weighted average, based on the life of a fund. Recent returns receive a slightly higher weighting, while older returns, which may have been produced under different conditions, are weighted less.
- 2. Rolling period returns A rolling period return divides a longer time frame into smaller time periods. A rolling 12-month return over five years is computed by first calculating a single period return over the first twelve months. Next, it calculates the 12-month return for months 2-13. The process continues until finally reaching the 12-month period spanning months 48-60. The final rolling figure reflects the average of all of the 12-month returns.
- 3. Batting Average Batting average is calculated by (1) tallying the number of months in a given observation window where the investment return is greater than the return of the peer group median return and (2) dividing this amount by the total number of months in the observation window. The result is a ratio that ranges between 0 and 1. A batting average of greater than 0.50 signifies that the investment has outperformed the peer group more frequently than it has underperformed, irrespective of the magnitude of any outperformance or underperformance.
- 4. Style Consistency to the appropriate index We utilize R-squared to assess whether the funds selected for the plan continue to operate and perform as expected within their appropriate asset class. R-squared measures the closeness between a fund's returns and movements in the benchmark. All active funds have some deviation from their benchmark, but excessive deviation could indicate that a fund is drifting away from its stated category mandate.
- 5. Modified Sharpe Ratio The standard Sharpe Ratio calculation is calculated by subtracting the risk-free rate of return (the US Treasury Bill is typically used) from the portfolio return and dividing the result by the portfolio's standard deviation. A higher Sharpe ratio indicates that the portfolio was able to generate a higher return per unit of risk. Modified Sharpe Ratio is a related statistic that is equal to the Sharpe Ratio under normal circumstances. However, the Modified Sharpe calculation adds an exponent to the denominator that effectively raises the denominator to the -1 power in circumstances in which an investment's excess return is negative. This modification ensures that investments with both negative excess returns and higher standard deviations rank lower than investment with negative excess returns and lower standard deviations. Under the standard Sharpe Ratio calculation, the opposite is true.
- 6. Alpha The use of Alpha allows us to gauge the effectiveness of the manager. Alpha is the difference between the portfolio's actual return and its expected return given the funds level of risk as calculated by beta.
- 7. Up Capture Ratio The up capture ratio calculates the percentage of return of an index that a fund has captured during up market cycles. It tracks the fund's relative performance versus the appropriate index when the index is going up.
- 8. Down Capture Ratio The down capture ratio calculates the percentage of return of an index a fund has captured during down market cycles. Funds that perform well in this category tend to reduce the downside loss for investors during bear markets.
- 9. Expense Ratio The expense ratio is compared to the appropriate category average expense and then given a score based upon that percentage. This rewards low-cost funds and penalizes high-cost funds. Expense ratios are effectively "double weighted" in our scoring methodology, because performance returns are already net of expenses. Since fiduciaries are encouraged to carefully manage expenses, we believe explicitly factoring in fund fees is prudent.

Each fund is benchmarked to a specific market index, and fund performance is evaluated and compared to a relevant peer group using Morningstar category classifications. A fund is given a peer group ranking for each criterion, shown as a percentage. The percentage rankings for all criteria are then averaged to give a fund its average ranking score. All funds with at least a three year track record are scored in the above manner. A fund is then classified as Top Decile, top Quartile, 2nd Quartile, 3rd Quartile or 4th Quartile based upon the overall score compared to all other funds within that particular asset category.

PASSIVE INVESTMENT OPTIONS ANALYSIS CRITERIA

All passive investment options are reviewed quarterly against their peer group and index benchmark to determine the performance and quality of each offering. Each are evaluated using the following criteria:

- 1. Expense Ratio The percentage of fund assets, net of reimbursements, used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Fund expenses are reflected in the fund's NAV. Sales charges are not included in the expense ratio. The Prospectus Net Expense Ratio is collected annually from a fund's prospectus.
- 2. Tracking Error A measure of the difference in returns between an investment and a benchmark. Tracking error is reported as a standard deviation of the difference between the returns of an investment and its benchmark.
- 3. R-Squared A statistical metric that ranges from zero to 100 and measures the percentage of portfolio's performance that is explained by the movement of its benchmark index. R-Squared is helpful in assessing the reliability of alpha and beta in explaining a portfolio risk and return characteristics. An r-squared of 100 would mean that the portfolio's performance movements are perfectly correlated with those of the benchmark over time, and would suggest that alpha and beta may be relied upon with a high degree of confidence.
- 4. Beta A measure of the volatility, or systematic risk, of an investment in comparison to a market index as a whole. Beta is calculated using regression analysis. Beta represents the tendency of an investment's returns to respond to moves in the market or index that it's calculated against. A beta of 1 indicates that the investment's price moves with the market. A beta of less than 1 means that the investment is theoretically less volatile than the market. A beta of greater than 1 indicates that the investment's price is theoretically more volatile than the market. The reliability of an investment's beta is a function of the investment's r-squared value in relation to the benchmark. A high r-squared value signifies that the beta measure is reliable, while a low r-squared signifies that it is potentially inaccurate.

Each of the criteria above caries a proprietary weight. An index fund is evaluated and ranked in each of the above criteria relative to their peer group. A fund is given a peer group ranking for each criterion. The percentage rankings for all criteria are then weighted to give a fund its average ranking score.

The raw score is then normalized on a scale of 1 to 100, with 1 being the best and 100 the worst. The top 75% of the funds in a category receive a passing score, while the bottom 25% fail.

STAFF REPORT

DATE: August 17, 2022 FOR: Board of Directors

SUBJECT: Transfer of 2021 Operating Fund Surplus to Contingency Fund

RECOMMENDATION

Staff recommends the Board entertain a motion to approve the transfer of \$964,180 of Operating Fund Surplus to the Contingency Fund.

BACKGROUND

The Golden Rain Foundation of Laguna Woods Operating Statement as of December 31, 2021 reflected an Operating Fund surplus of \$964,180 (net of depreciation). The Operating Fund is budgeted to break even, excluding depreciation. However, savings in compensation partially offset by increased insurance expense allowed the year to end with a \$964,180 operating surplus.

DISCUSSION

IRS Revenue Ruling 70-604 requires an operating surplus to either be returned to the membership or be applied to future year's assessment. Consistent with 2021, the recommendation is to transfer the surplus to the Contingency Fund (CNF).

FINANCIAL ANALYSIS

The final excess of revenues over expense for the Operating Fund, as presented on the Changes in Fund Balance – Final 12/31/2021 (ATT1), was (\$4,402,133). Detail of the depreciation adjustment to the operating surplus amounted to (\$5,366,313). The net of the two balances leaves Golden Rain Foundation of Laguna Woods with a Total Operating Fund Surplus of \$964,180.

Golden Rain Foundation of Laguna Woods Community Activities Committee August 11, 2022 Page 1

STAFF REPORT

DATE: August 11, 2022

FOR: Community Activities Committee

SUBJECT: Golf Fee Pricing

RECOMMENDATION

Review and approve the proposed Schedule of Golf Fees (ATT1), inclusive of changes to green fees for members and guests, with an effective date of January 1, 2023.

BACKGROUND

The Golf Fees administered by the Golden Rain Foundation of Laguna Woods Board of Directors adhere to the Shared Cost Guidelines established in Resolution 90-12-132 (ATT2), whereby certain fees can be imposed upon users of various recreation facilities in order to control crowding and minimize over-usage, and to recover operating costs.

DISCUSSION

To ensure Golf Fees are being reviewed regularly and that revenues earned from fees are sufficient to offset a consistent and agreed upon share of costs, staff compiled a five-year analysis of revenues and expenses including a percent funded by fees. Every two years (even numbered years), staff will compare golf revenues earned through fees to expenses incurred. Staff will then propose fee changes (increase/decrease) to ensure the shared costs stay within a set percentage. Staff recommends the percent of golf expenses to be funded by fees shall equal approximately 70% - 75% while the percentage of costs to be shared by all residents shall equal approximately 25% - 30%.

FINANCIAL ANALYSIS

If approved, the Schedule of Golf Fees will reflect total golf expenses covered by fees of 74% and a cost shared by the community of 26%. While the proposed change to golf fees would increase revenue by an estimated \$471,000 (ATT3) in 2023, as compared to 2022, the proposed fees are expected to maintain the shared cost percentage between 25% and 30% through 2024 inclusive of anticipated inflation of 3%.
