### PERMISSION TO OPERATE

Self-Generation Facility Interconnected to SCE's Electric Grid

2/9/2017

**United Laguna Woods Mutual**  
583 E Bonita Ave  
Suite C  
San Dimas, CA 91773

Dear Customer:

Congratulations on completing the installation of your self-generation facility. Your application for interconnection has been approved and Permission to Operate your system has been granted:

Project ID	Generating Facility Address	CEC-AC Nameplate Rating (kW)
SCE-82722	23 Laundry Mutual 2, Laguna Woods CA 92653	82.329

If, at any time, SCE determines that this generating facility is not in compliance with the terms of the Net Energy Metering (NEM) Interconnection Agreement signed as part of your application to interconnect, this Permission to Operate may be revoked. Terms of the Agreement are available at [www.sce.com/nem](http://www.sce.com/nem). SCE may inspect your electrical service panel to ensure it meets SCE's electrical service requirements for the generation system you have selected. Electric service panels not meeting SCE's requirement will be required to be corrected in order for SCE to allow continued operation of your generating system in parallel with SCE's electrical system. For further details regarding service panel requirements, please review SCE's tariff Rule 16 at <http://www.sce.com/NR/sc3/tm2/pdf/Rule16.pdf>.

Service under your applicable NEM rate schedule becomes effective within 30 working days of the date SCE received your completed application to interconnect your generating facility. Once that date has passed, and your system is turned on following receipt of this Permission to Operate, your electric bill will be modified to account for your generating facility's production.

Under the NEM rate option, residential and small business account served under Rate Schedule GS-1 are billed once a year for the "net" energy consumed or generated each month over the previous 12 months, if any. An annual settlement energy bill will come once every 12 months, and payment for your **energy usage charges** for the entire year will be due at that time. Large business NEM accounts are billed monthly for energy usage. It is recommended that you monitor energy usage charges found in the last pages of your bill. All customers must also pay monthly **non-energy charges**, which include utility taxes and city/county fees. If you have paid more than the non-energy charges due, your bill will indicate "Do not pay. Your account has a credit balance."

If, over the course of a one-year billing period, you generate more excess electricity than you use, you may be eligible to receive compensation for net surplus electricity in accordance with Assembly Bill 920, signed into law on October 11, 2009. For more information, visit <http://www.sce.com/customergeneration/nem-ab920.htm>.

For questions related to billing or rebates, please contact SCE's Customer Service Department at (866) 701-7868 for residential customers or (866) 701-7869 for commercial customers.
