

OPEN MEETING

**REGULAR MEETING OF THE THIRD LAGUNA HILLS MUTUAL
ENERGY COMMITTEE**

**Wednesday, March 7, 2018 - 1:30 P.M.
Laguna Woods Village Community Center Cypress Room
24351 El Toro Road**

NOTICE and AGENDA

This Meeting May be Recorded

1. Call to Order
2. Acknowledgment of Media
3. Approval of the Agenda
4. Approval of Meeting Report for February 7, 2018
5. Chairman's Remarks
6. Member Comments (*Items Not on the Agenda*)
7. Department Head Update

Consent:

All matters listed under the Consent Calendar are considered routine and will be enacted by the Committee by one motion. In the event that an item is removed from the Consent Calendar by members of the Committee, such item(s) shall be the subject of further discussion and action by the Committee.

8. Project Log
9. SCE Street Light Outage Report

Open Pilot Initiatives:

10. Walkway Lighting at Gates 5 & 6 – Pilot Project Update (oral discussion)

Reports:

11. Electric Vehicle Report
12. Golf Cart Report
13. Walkway Lighting Report for United Mutual (November 9, 2010)
14. Village Energy Committee (oral discussion)
15. Survey at Gates 7 & 8 Update (oral discussion)
16. Prioritize Third Mutual Energy Projects for Energy Consultant (oral discussion)
17. VMS Oversight of Third Mutual Street Light Acquisition Project (oral discussion)

Items for Future Agendas:

- *Contract Award for Walkway Lighting in Gates 5 & 6
- *Survey Results for Walkway Lighting – Gates 7 & 8
- *EV Charging Stations at Stand Alone Laundry Rooms
- *LED Solar Street Lights (low priority)
- *2-story Buildings LED Lighting Pilot Program (low priority)
- *Costs for Level 2 Charging Stations at Stand-alone Laundry Rooms (low priority)
- *Investigate the installation of conduit from the electric panels in GV to service the carports
- *Install Level II EV Bollard Chargers (on the streets)
- *2-3 Year Energy Plan: (Verbal Discussion)
 - a) Distributed Energy Resources Contract
 - b) Microgrid Investigation
 - c) Street Light LED Replacement Program
 - d) Street Light Maintenance Contract

Concluding Business:

Date of next meeting – May 2, 2018
Adjournment

Bill Walsh, Chair
Ernesto Munoz, Staff Officer
Telephone: 268-2281

OPEN MEETING

REPORT FOR REGULAR MEETING OF THE THIRD LAGUNA HILLS MUTUAL ENERGY COMMITTEE

Wednesday, February 07, 2018 - 1:30 P.M.
Laguna Woods Village Community Cypress Room
24351 El Toro Road

MEMBERS PRESENT: Bill Walsh – Chair, John Frankel, Burt Baum

Advisors: Steve Leonard, Diane Phelps (in for Jim Juhan)

MEMBER ABSENT: Bert Moldow

OTHERS PRESENT: Suzy Caine, Rosemarie di Lorenzo, Pat English, Kathryn Freshley

STAFF PRESENT: Ernesto Munoz - Staff Officer, Mark Stal, David Collins, Laurie Chavarria

1. Call to Order

Chair Walsh called the meeting to order at 1:30 P.M.

2. Acknowledgment of Media

Chair Walsh noted no members of the media were present.

3. Approval of the Agenda

Chair Walsh added Energy Meeting Date Change to the agenda as item 17. The agenda was approved as amended.

4. Approval of Meeting Report for December 5, 2017

The Meeting Report of December 5, 2017 was approved as written.

5. Chair's Remarks

Chair Walsh commented on the importance of expanding the Energy Committee to include voting members from GRF and United Mutual. Chair Walsh wants to induce more communication for energy-related community wide projects.

Third Energy Committee
February 7, 2018
Page 2 of 5

Advisor Leonard and Director Baum concurred with Chair Walsh. Director di Lorenzo shared concerns about the length of the meeting if it becomes combined and losing focus on energy issues that affect the individual corporations.

Ernesto Munoz suggested that they start with advisors from GRF and United Mutual instead of forming a joint energy meeting.

6. Member Comments (*Items Not on the Agenda*)

- Pat English (928-A) commented on a combined energy committee, hydrogen cars, electrical infrastructure and alteration solar panels.
- Kathryn Freshley (5490-N) commented on the solar project in Third Mutual and how GRF has prioritized facility maintenance needs.

7. Department Head Update

Ernesto Munoz provided an update on solar project documents now available for review on the Laguna Woods Village website and the solar street light on Del Faro.

Link to Solar Project Documents:

Discussion ensued about purchasing equipment and cleaning panels with in-house staff, solar generation in United, and potential for GRF solar and solar generation monitoring. Staff will send the website link to Directors Phelps, di Lorenzo and Caine.

Proposal for Permanent Installation of the Solar Street Light on Del Faro:

Discussion ensued regarding the cost of the proposal, why this street light is needed, is the light cost effective, photometric studies and lumens.

Staff will leave the light in place as is until Siemens can be asked to prepare a photometric study with a recommendation on whether to make the light pole permanent or to remove it. Staff will also request a quote from Supergreen for installation with an aluminum pole.

Consent:

All matters listed under the Consent Calendar are considered routine and will be enacted by the Committee by one motion. In the event that an item is removed from the Consent Calendar by members of the Committee, such item(s) shall be the subject of further discussion and action by the Committee.

A motion was made and unanimously carried to approve all items listed in the Consent Calendar.

Third Energy Committee
February 7, 2018
Page 3 of 5

- 8. Project Log
- 9. SCE Street Light Outage Report

Chair Walsh commented on the number of outages, and the struggle with SCE to get a light pole replaced in CDS 364.

Open Pilot Initiatives:

10. Walkway Lighting at Gates 5 & 6 – Pilot Project Update (oral discussion)

Ernesto Munoz and Mark Stal provided an update on the walkway lighting pilot in Gates 5 & 6 and answered questions from the committee.

As soon as the lighting consultant raises the level of the poles from 24 inches to 36 inches, the committee will be notified. The cost of the installation will be revised in their proposal and submitted to committee for review.

Discussion ensued regarding Gate 6 lighting levels, walkway lighting in United Mutual, ADA requirements, and safety.

Staff will provide the November 9, 2010 staff report on the lighting survey in United Mutual for review at the March Energy Committee meeting.

Reports:

11. Energy Committee Charter

This item will be postponed until after the Third Mutual Board meeting on February 20, 2018. This item will be added to the March Energy Committee meeting agenda and Chair Walsh will discuss the Boards' recommendation.

12. Solar Project Cleaning Schedule & Documentation Update (Mark)

Mark Stal provided an update on the twice yearly cleaning of the solar panels and answered questions from the Committee.

Discussion ensued regarding communication with residents, notifications to be posted, and building captains informed.

13. Electric Vehicle & Golf Cart Report

Advisor Leonard commented on the goals of the electric vehicle report and the increase of electric vehicles in the community during the last 4 years.

Advisor Leonard was asked to create a plan on how to collect the pertinent data and to work with Chuck Holland and Resident Services in order to make sure the reported vehicle registrations are accurate. The goal of this report is to identify the critical locations of where electric vehicle charging stations will be needed.

Discussion ensued on the location of future electric vehicle charging stations, tracking the areas where electric vehicles are parked, tracking the growth rate of electric vehicles, upgrading the electrical infrastructure in Third Mutual, an accurate system for entering data when registering an electric vehicle, collecting vehicle identification numbers, providing a detailed report for security's use, and a long range plan for infrastructure upgrades at GRF clubhouses to install charging stations.

Advisor Phelps asked about charging stations for Clubhouses 2 and 7 and if they may be needed elsewhere. Ernesto Munoz will review a proposal received from Voltaic and provide an update at the next Energy Committee meeting.

By consensus, staff was asked to provide a separate report at each Energy Committee meeting on the number of electric golf carts in the community.

14. Walkway Lighting Survey at Gates 7 & 8 Update (oral discussion)

Ernesto Munoz stated that the walkway lighting survey at Gates 7 & 8 has been completed by the consultant. Staff is waiting for the report and will bring back a summary of the consultant's recommendations when it has been received and reviewed.

15. RFP for Energy Consultant Services (oral discussion)

Ernesto Munoz stated that the RFP for Energy Consultant Services has been released. Bids are due in March. A recommendation for a contract award will be presented at the April M&C Committee meeting.

16. EV Charging Stations at Stand Alone Laundry Rooms (oral discussion)

Ernesto Munoz stated that he is working with ChargePoint on their proposal for charging stations in United Mutual. The proposal does not yet address costs related to the review of the existing electrical systems, capacity of panels, and possible infrastructure upgrades. Once the consultant has a firm knowledge of what the community needs, they will request a similar proposal for Third Mutual.

Discussion ensued regarding distance of charging stations from laundry rooms, and other locations available for charging stations.

17. Energy Committee Meeting Date Change

Chair Walsh requested that the Energy Committee meeting be changed to accomodate attendance from members that have conflicting scheduled.

By consensus, the Energy Committee meeting date will be moved to the first Wednesday of ODD months, at 1:30 pm, starting March 7, 2018. Director Phelps and Troutman will be attending on behalf of Director Juhan until his return from a medical leave of absence.

Items for Future Agendas:

- *Contract Award for Walkway Lighting in Gates 5 & 6
- *Survey Results for Walkway Lighting – Gates 7 & 8
- *Solar Street Light on Del Faro
- *LED Solar Street Lights (low priority)
- *2-story Buildings LED Lighting Pilot Program (low priority)
- *Costs for Level 2 Charging Stations at Stand-alone Laundry Rooms (low priority)
- *Investigate the installation of conduit from the electric panels in GV to service the carports
- *Install Level II EV Bollard Chargers (on the streets)
- *2-3 Year Energy Plan: (Verbal Discussion)
 - a) Distributed Energy Resources Contract
 - b) Microgrid Investigation
 - c) Street Light LED Replacement Program
 - d) Street Light Maintenance Contract

Concluding Business:

Date of next meeting – March 7, 2018

Adjournment - This meeting was adjourned at 3:26 PM

Bill Walsh, Chair

Third Mutual Energy Committee Project Log (February 2018)

#	Type	Name	Description	Status	Estimated Completion	Budget
1	904 Maint Svc	Solar Street Light Pilot Program	The Energy Committee directed staff to install a solar powered street light as a pilot project. The Committee's goal was to determine whether the solar street light was an economical option to improve street lighting levels without trenching for new conduits.	The pilot installation was completed approximately one year ago on Del Faro. The Board has expressed interest in keeping this fixture and requested a quote to install it permanently. A quote was procured and provided to the Committee for use of a marblemight pole to match others in the community. The Committee directed staff to ask the contractor to wait until Siemes completes the light assessment to determine whether this pilot should be installed permanently. Pilot is on hold.	N/A	Not Budgeted
2	904 Maint Svc	Electrical Systems	This program is dedicated to repairing or replacing electrical equipment as needed.	Funding is provided for this program as a contingency to address electrical panel failures. No replacements are scheduled at this time.	December 2018 Annual	Budget: \$50,000 Invoiced: \$0 Balance: \$50,000
3	920 Projects	Energy Projects	Funding was allocated to advance energy initiatives to reduce the Mutual's energy footprint. These efforts will include partnering with all Boards to pursue an overall energy strategy for the community. Investigate issues such as: Community Choice Aggregation (CCA); Energy Generation During Power Outages; Battery Storage Facilities to help regulate energy flow; Residential Application of Fuel Cell technology; Upgrade of the Community's Aging Electric Infrastructure; Time of Use Strategies; Performance Management Services to Ensure Accurate Billing Rates from SCE; and Infrastructure Upgrades for Electric Vehicle Charging Stations. These are just a few of the topics Board Members have expressed an interest in, and a desire to obtain professional guidance on.	A consultant will be retained on an on-call basis for a not to exceed contract amount. Staff was directed to release the RFP for the consultant services.	December 2018	Budget: \$50,000 Invoiced: \$0 Balance: \$50,000

4	920 Projects	Exterior Lighting The Third Board allocated funding in 2018 towards the purchase of the Southern California Edison street light infrastructure. Additionally, funding will be allocated to offset the cost of consulting services to assist with the acquisition, and the upgrade of other exterior lighting. This program also includes funding for walkway lighting needs.	Street Lights: The M&C recommended approval of a contract with Siemens to assist with the street light acquisition, retrofit of the existing lighting fixtures, and to perform the operations and maintenance of the asset. A recommendation to award a contract to Siemens was presented to the Board on February 20th. Staff was directed to forward the contract with Siemens for legal counsel's review. Walkway Lighting: US Energy has performed a lighting audit in the Gates 5 and 6. Two pilot fixtures have been installed, and will be adjusted in height per the request of the Committee. US Energy has also performed an audit of the walkway lighting in Gates 7 & 8; results are expected in early March.	December 2018	Budget: \$500,000 Invoiced: \$0 Balance: \$500,000

UNITED LAGUNA HILLS MUTUAL

United Mutual Walkway Lighting

DATE: November 9, 2010

FOR: United Laguna Hills Mutual
Board of Directors

SUMMARY / RECOMMENDATION

A lighting consultant has performed a survey of the existing walkway lighting system in United Mutual. The subject report below outlines alternatives for replacing the walkway lighting within the Mutual. If the board elects to enhance the walkway lighting, then Staff recommends using the LED light fixture options of the listed alternatives.

BACKGROUND INFORMATION

United Mutual has 89 cul-de-sacs. Each cul-de-sac contains a network of walkway lights. Currently there are approximately 2,600 walkway lights located on the outdoor walkways. In addition to walkway lighting there are street lights, carport lights and building lights within the Mutual. Most of the existing walkway light fixtures are low level luminaries with florescent lamps (see Attachment A).

The 2010 Reserve Expenditures Plan included \$50,000 to retain a lighting consultant to survey the existing walkway lighting in United Laguna Hills Mutual. The lighting consultant has conducted a survey of the system and has provided three-tiered options to enhance the walkway lighting, inclusive of budgetary estimates to apply each option throughout the Mutual.

Four cul-de-sacs were surveyed in an effort to obtain a representative sample of the walkway lighting configuration for United Mutual. The results have been extrapolated to estimate the number of fixtures and costs associated with the alternatives under consideration. Based on the four cul-de-sacs that were surveyed by the lighting consultant, the locations and spacing of the light fixtures conforms to some extent with directional lighting installed at inconsistent intervals. Directional lighting indicates direction and elevation changes along the walkway.

The electrical distribution system for the walkway lighting originates at the circuit breaker panel boards located in the laundry rooms. The existing electrical panel boards are original equipment and have been in use for approximately 45 years. The panel boards are typically fully utilized with no spare circuit breakers or space available to add new circuit breakers (see Attachment B). The conduit for the walkway lighting is routed from the circuit breaker to the light fixture under ground and is also approximately 45 years old. The lighting consultant states that the common service life for outdoor lighting and electrical equipment is 20 years.

The walkway lights and electrical distribution system are repaired as needed from the electrical systems portion of the operating budget. Security Staff regularly inspects the common area lighting and reports problems with the light fixtures to Property Services. Members also call Property Services to report problems with the walkway lights. Electricians respond to service tickets and make appropriate repairs. Items like panel, light fixture and/or lamp replacements

are not budgeted for with a reserve plan for replacement. The existing walkway lighting system is repaired on a reactive basis as issues are reported to Property Services.

Members can request additional walkway lighting. The criteria set forth by United Mutual requires that installation of additional walkway lighting will be considered at locations where a walkway directional change and/or elevation change is not presently lighted. Other considerations are the distance from the nearest lighting, electrical sources, and surrounding conditions. Last year, the Committee gave authorization for three additional walkway lights to be installed per month that meet the criteria for an additional walkway light. The three per month were to be funded out of Mutual operating expenses.

ANALYSIS / ALTERNATIVES

The consultant has identified various types of light fixtures and lamps available for walkway lighting. In areas adjacent to housing, it is recommended to use low level, bollard type light fixtures to provide lighting along the walkways and limit unnecessary light trespass into the adjacent living spaces (see Attachment C). The height of low level lighting typically ranges from 24" to 42" depending on the fixture type. Compact fluorescent, metal halide and LED are the three lamp types being proposed throughout the alternatives. The lighting consultant proposed the light fixtures summarized below because of aesthetics, longevity and ease of maintenance. Summary about each lamp type:

Compact florescent lamps have the lowest fixture and lamp replacement cost. The lamp life is approximately 4 years. The lamps have very little lumen depreciation and are considered energy efficient. The compact fluorescent fixtures involve lamp replacement every 4 years and bollard replacement every 20 years.

Metal halide lamps are middle of the road in terms of fixture and lamp replacement cost. The lamp life is approximately 3½ years. The lamps lumen output can degrade significantly over the life of the lamp. This degradation can lead to a color shift in the light output of the lamp that becomes apparent as the lamp ages and as old lamps are replaced with new. These lamps use more energy than the compact fluorescent lamps. The metal halide fixtures involve lamp replacement every 3½ years and bollard replacement every 20 years.

LED lamps have the highest fixture and lamp replacement cost. However, the lighting consultant anticipates a decrease in costs for LED light fixtures as technology and manufacturing processes improve along with greater market demand for the product. The lamp life is approximately 20 years. The lamps maintain their lumen output very well with little to no lumen depreciation over the life of the lamp and there is a very good color consistency between lamps. These lamps are the most energy efficient of the three lamp types. The LED fixtures involve bollard and lamp replacement every 20 years

Each of the lamps options above are more energy-efficient than existing lamps. However, all of the alternatives below propose an increase in the quantity of walkway lights and/or installation of higher wattage lamps which will likely lead to an increase in energy consumption within the Mutual. Higher wattage lamps are recommended to achieve the necessary light

output. To be considered for most grants and Southern California Edison credits, a decrease in energy consumption is required. Consequently, it is not anticipated that any grants or SCE credits will be available with the installation of a new lighting system.

Based on the lighting consultant's review of the electrical demand loads, there is sufficient electrical capacity remaining at each panel location to accommodate the increase in electrical demand. However, installing a new lighting system will require the electrical infrastructure to be modified. As mentioned earlier, the panel boards are typically fully utilized with no spare circuit breakers or space available to add new circuit breakers. Therefore, the interior components of the existing panel boards will be replaced with new bussing and circuit breakers. The advantages of only replacing the interior components are minimal disruption to the existing structure, minimum down time and lower overall cost.

The conduit that feeds the light fixtures was installed about 45 years ago. It is not recommended to use the existing conduit if a new lighting system is being installed. The electrical conduit upgrades will include trenching, routing and backfill of all new conduits from the panel board to each new light fixture.

Below are three alternatives for replacing the walkway lighting within the entire Mutual summarized from the lighting consultants report. Each alternative has a cost estimate for the three lamp types and the electrical upgrades summarized above. Ten year implementation is being proposed on the alterations other than status quo, as an example time frame. The proposed system annual costs include energy, maintenance and replacement costs. The maintenance cost includes lamp replacement and a maintenance cost estimated based on a percentage of the total lighting system installation cost. The replacement cost includes the amount that would be budgeted each year for the replacement of the light bollards at year 20.

Depending on the Alternative that is approved by the Board, an analysis of the reserve fund would be required to determine an optimum time frame for implementation.

Alternative One: Install New Light Fixtures at Existing Locations

Under this alternative, approximately 2,800 new walkway lights will be installed (see Attachment D). 2,600 new light fixtures will be installed at their existing locations. This alternative also proposes 200 additional light fixtures. This will allow for the engineer to make slight additions in light fixtures to the existing system during the design phase.

Although there are only minor increases to the quantity of light fixtures, electrical upgrades are required due to the changes proposed to the existing lighting system. There will be an increase in energy costs due to higher wattage lamps and slight increase in light fixtures. Below are the cost estimates for the three lamp types and an analysis of the effects on the annual operating costs:

Capital Outlay	Cost		
	Compact Fluorescent	Metal Halide	LED
Engineering Services ¹	\$445,000	\$445,000	\$445,000
Electrical Upgrades ¹	\$1,621,000	\$1,621,000	\$1,621,000
Lighting System Installation ¹	\$1,963,000	\$2,221,000	\$2,311,000
Permits ¹	\$178,000	\$178,000	\$178,000
10% Contingency	\$421,000	\$447,000	\$456,000
Total Lighting System Installation Cost	\$4,628,000	\$4,912,000	\$5,011,000

10-year Implementation

Total Lighting System Cost	\$4,628,000	\$4,912,000	\$5,011,000
Cost each year	\$462,800	\$491,200	\$501,100

The 30-year reserves plan does not currently include replacement of walkway lighting in the Mutual common areas. Funding for the annual replacement costs of this alternative would range from \$6 to \$7 per manor per month, depending on the bulb option chosen, over the 10 year implementation period. However, the replacement reserve balances are currently projected to exceed the baseline funding threshold over the next 10 years and could be used to offset up to half of the unplanned lighting replacement costs.

Below is a summary of the annual operating costs:

Proposed System Annual Costs	Compact Fluorescent	Metal Halide	LED
Energy Costs ¹	\$139,000	\$166,000	\$60,000
Maintenance Costs ¹	\$22,000	\$32,000	\$2,000
Replacement Costs ¹	\$98,000	\$111,000	\$116,000
Total	\$259,000	\$309,000	\$178,000
Existing System Annual Costs ²	(\$105,000)	(\$105,000)	(\$105,000)
Annual Operating Increase	\$154,000	\$204,000	\$73,000

The lighting consultant summarized the total capital and operating cost for the lighting system over 25-years:

	Compact Fluorescent	Metal Halide	LED
Total 25-Year Cost ¹	\$10,595,000	\$12,085,000	\$8,870,000

Notes:

- 1) Cost estimate provided by the lighting consultant.
- 2) Estimate of the existing annual maintenance and energy costs based on 2009 data

Alternative Two: Install New Walkway Lights at Directional and Elevation Changes

Under this alternative, approximately 5,800 new walkway lights will be installed at directional and elevation changes (see Attachment E). This is consistent with the Mutual's Walkway Lighting Request policy that walkway lighting is intended to indicate changes in direction or elevation within a walkway. This alternative proposes a redesign to the Mutual's walkway lighting. In some cases, new walkway lights won't be installed in their previous locations. It is estimated that this alternative will add approximately 3,200 light fixtures to the Mutual.

Electrical upgrades are required due to the significant change proposed to the existing lighting system. Energy costs will increase due to the higher wattage lamps and increase in light fixtures. Below are the cost estimates for the three lamp types and an analysis of the effects on the annual operating costs:

Capital Outlay	Cost		
	Compact Fluorescent	Metal Halide	LED
Engineering Services ³	\$445,000	\$445,000	\$445,000
Electrical Upgrades ³	\$3,121,000	\$3,121,000	\$3,121,000
Lighting System Installation ³	\$4,070,000	\$4,603,000	\$4,789,000
Permits ³	\$178,000	\$178,000	\$178,000
10% Contingency	\$782,000	\$835,000	\$854,000
Total Lighting System Installation Cost	\$8,596,000	\$9,182,000	\$9,387,000

10-year Implementation

Total Lighting System Cost	\$8,596,000	\$9,182,000	\$9,387,000
Cost each year	\$859,600	\$918,200	\$938,700

The 30-year reserves plan does not currently include replacement of walkway lighting in the Mutual common areas. Funding for the annual replacement costs of this alternative would range from \$11.50 to \$12.50 per manor per month, depending on the bulb option chosen, over the 10 year implementation period. However, the replacement reserve balances are currently projected to exceed the baseline funding threshold over the next 10 years and could be used to offset a small portion of the unplanned lighting replacement costs.

Below is a summary of the annual operating costs:

Proposed System Annual Costs			
Energy Costs ³	\$289,000	\$345,000	\$124,000
Maintenance Costs ³	\$46,000	\$68,000	\$6,000
Replacement Costs ³	\$204,000	\$230,000	\$240,000
Total	\$539,000	\$643,000	\$370,000
Existing Annual Costs ⁴	(\$105,000)	(\$105,000)	(\$105,000)
Annual Operating Increase	\$434,000	\$538,000	\$265,000

The lighting consultant summarized the total capital and operating cost for the lighting system over 25-years:

	Compact Fluorescent	Metal Halide	LED
Total 25-Year Cost³	\$21,041,000	\$24,110,000	\$17,426,000

Notes:

3) Cost estimate provided by the lighting consultant.

4) Estimate of the existing annual maintenance and energy costs based on 2009 data

Alternative Three: Install New Walkway Lights to Provide an Even Light Distribution

Under this alternative, approximately 14,700 new walkway lights will be installed along the entire walkway to provide an even distribution of lighting (see Attachment F). This configuration will provide the entire walkway with even illumination. This alternative proposes a redesign to the Mutual's walkway lighting. In some cases, new walkway lights won't be installed in their previous locations. It is estimated that this alternative will add 12,100 light fixtures to the Mutual.

Electrical upgrades are required due to the significant change to the existing lighting system. Energy costs will also increase due to the higher wattage lamps and significant increase in light fixtures. Below are the cost estimates for the three lamp types and an analysis of the effects on the annual operating costs:

Capital Outlay	Cost		
	Compact Fluorescent	Metal Halide	LED
Engineering Services ⁵	\$445,000	\$445,000	\$445,000
Electrical Upgrades ⁵	\$7,787,000	\$7,787,000	\$7,787,000
Lighting System Installation ⁵	\$10,319,000	\$11,672,000	\$12,142,000
Permits ⁵	\$178,000	\$178,000	\$178,000
10% Contingency	\$1,873,000	\$2,009,000	\$2,056,000
Total Lighting System Installation Cost	\$20,602,000	\$22,091,000	\$22,608,000

10-year Implementation

Total Lighting System Cost	\$20,602,000	\$22,091,000	\$22,608,000
Cost each year	\$2,060,200	\$2,209,100	\$2,260,800

The 30-year reserve plan does not currently include replacement of walkway lighting in the Mutual common areas. Funding for the annual replacement costs of this alternative would range from \$27 to \$30 per manor per month, depending on the bulb option chosen, over the 10 year implementation period. Although the projected replacement reserve balance currently

exceeds the baseline threshold, the margin is not significant enough to reduce the funding requirement for this level of unplanned lighting replacement costs.

Below is a summary of the annual operating costs:

Proposed System Annual Costs			
Energy Costs ⁵	\$732,000	\$871,000	\$314,000
Maintenance Costs	\$115,000	\$172,000	\$14,000
Replacement Costs ⁵	\$516,000	\$584,000	\$607,000
Total	\$1,363,000	\$1,627,000	\$935,000
Existing Annual Costs ⁶	(\$105,000)	(\$105,000)	(\$105,000)
Annual Operating Increase	\$1,258,000	\$1,522,000	\$830,000

The lighting consultant summarized the total capital and operating cost for the lighting system over 25-years:

	Compact Fluorescent	Metal Halide	LED
Total 25-Year Cost ⁵	\$52,096,000	\$59,838,000	\$42,950,000

Notes:

5) Cost estimate provided by the lighting consultant.

6) Estimate of the existing annual maintenance and energy costs based on 2009 data

Alternative Four: Status Quo

Under this alternative, the walkway lighting within the Mutual will remain the same. The existing walkway lighting will continue to be maintained from the operating budget. Currently the lighting system is repaired as requests are made through Property Service. If no significant upgrades to the existing light system are going to be made in the near future, the Board may consider including a replacement fund expenditure in future reserve expenditures plans. This replacement fund line item could include funds for proactive replacement of lamps, ballasts and electrical equipment. \$35,000 has been expended to date on the consultants lighting survey. Technological advances may lead to more cost effective alternatives in the future, although deterioration of the existing system may accelerate due to the age of the components.

Third Energy Project Log List Priorities

2017-2018 Plan Priorities

- | | | |
|-------|---|-----------------------------|
| I. | Street Light Acquisition - | In Progress |
| | a. Retag Acquired Street Lights | |
| | b. Street Light Maintenance | |
| | c. Convert to LED lights | |
| II. | Measure savings on solar installations - | In Progress |
| III. | Solar Maintenance Agreement | Complete |
| IV. | Solar Project Documentation | Complete (? – PTO letters?) |
| V. | Tree Trimming around Street Lights
Landscape planning) | In Progress (long term |
| VI. | Walkway Lighting in Gates 5 & 6 | Ongoing Pilot |
| VII. | Walkway Lighting in Gates 7 & 8
results | Survey complete – awaiting |
| VIII. | Energy Consultant | RFP issued |
| IX. | 20-gallon Laundry Room water heaters in Laundry Rooms | |
| X. | Install Commercial Coin Operated washers in Laundry Rooms | |
| XI. | Emergency Lighting in GV garages | In Progress – 5 year plan |

Two Year Plus Plan Priorities

- I. Additional Solar Installations at Gate 14
- II. Electricity Panels in Garden Villa buildings
- III. Community Choice Aggregation
- IV. PEV Charging stations near Standalone Laundry Rooms
- V. Investigate Battery applications
- VI. Investigate Fuel Cell applications
